Science Word of the Week

EQUINOX and SOLSTICE

Equinoxes and solstices mark the start of Earth's seasons

Equinoxes and solstices mark the maximums, minimums and mediums of hours spent in daylight.

Hundreds of millions of people in Central Asia, the Middle East and elsewhere around the world celebrate the new year, or Nowruz, on the spring equinox. Here, a table is set up with symbolic Nowruz items, such as an apple, garlic and coins

Science explained...

Deepthi in 4D explains one of this week's big stories about the spring equinox.

If you want to find out more about the spring equinox, click on the picture above.

Do you have a science news story you want to share?

How about a lovely piece of science work you're proud of?

Perhaps an extraordinary experiment or piece of research you've done at home?

What about a wonderful science word for our Word of the Week?

Let your teacher know or come and see Mr. Humphrey
